COURSE SUBMISSION INDEX

Name :		**Roll No :**	
Class & Sem :	**TECO / V**	**Batch :**	
Curriculum :	**2024-28**	**Academic Year :**	**2026-27**
Course :	**Cloud Computing Fundamentals Lab**	**Course Code :**	**COPEL5012**

SR NO.	TITLE OF EXPERIMENTS	MARKS (5)
1	Case study on Any Cloud Service Provider - History, Services Offered, Pricing Plans, Data Center Locations.	
2	Installation and configuration of KVM - A Type 1 Hypervisor to create and manage virtual machine and explore paravirtualization settings	
3	Implement the concept of Full Virtualization by Configuring a virtual machine using VirtualBox - A Type 2 Hypervisor	
4	Implementation of a cloud storage server on local machine by using Own Cloud/ Nextcloud	
5	Study and implementation of Infrastructure as a Service (IAAS) cloud service model using AWS EC2	
6	Study and implementation of Storage as a Service (STaaS) cloud service model using AWS S3	
7	Study and implementation of Database as a Service (DBaaS) cloud service model on a SQL/NoSQL Database	
8	Creating Containerized applications with Dockers and exploring DockerHub	
9	Case Study on Edge Computing and Fog Computing	
10	Deployment of a Web Application using Platform as a Service (PaaS) Environment	
	ACTIVITIES	**MARKS (3)**
1	Earn a Digital Badge for a Quiz on AWS EC2 - Compute Service	
2	Earn a Digital Badge for a Quiz on AWS S3 - Storage Service
